## 1. Cover Letter

Dear Baraka,

Thank you for the opportunity to partner with you on the development of the **M-Kristo App** — a mobile daily-devotions platform designed to bring the Bible, prayers (Sala and Novena), hymns (Tenzi), daily devotions (Neno la Leo, Tafakari and Somo) and personal notes to believers across Tanzania and East Africa, in both Swahili and English.

This proposal sets out our understanding of the project, the scope of the development work, the deliverables, and the agreed budget and payment schedule. The pricing in this document covers **software development only**, as discussed.

We are confident that BlueGrid Technologies can deliver a modern, reliable and scalable product that meets your goals. We look forward to your acceptance and to beginning work.

Warm regards,

**Philip Steven Chediel**

BlueGrid Technologies

## 2. About BlueGrid Technologies

BlueGrid Technologies is a Tanzania-based software company that designs and builds modern mobile and web applications. We focus on clean design, reliable engineering and solutions tailored to the East African market. Our work spans mobile app development, backend systems, cloud hosting and ongoing technical support.

| Detail         | Information                                                |

| Focus          | Mobile apps, backend systems, cloud deployment             |

### 3. Project Understanding & Objectives

M-Kristo is a cross-platform mobile application (Android and iOS) that delivers spiritual content and community features to a primarily Swahili-speaking audience, with full English support. The key objectives of the project are:

- Provide a free, accessible Bible and daily devotional content.
- Offer prayers (Sala, Novena), hymns (Tenzi) and reflections (Neno la Leo, Tafakari, Somo) in Swahili and English.
- Let users take and save personal notes and mark favourites.
- Provide secure sign-up and login, including social login and phone number verification via a one-time code (OTP).
- Unlock advanced content (e.g. Shajara, full Tenzi and other premium resources) through monthly and annual subscriptions.
- Allow users to share the app on both Android and iOS.
- Deliver push notifications for daily content and reminders.

## 4. Scope of Work (Development)

The following development work is included in this proposal. Features are grouped by area for clarity.

### 4.1 Mobile Application

- Onboarding, sign-up and login screens.
- Social login (e.g. Google, Apple) and phone-number OTP verification.
- Main navigation: Bible, Novena, Tenzi, Sala, Favourites and Profile.
- Bible reader with Swahili and English versions.
- Daily content modules: Neno la Leo, Tafakari and Somo.
- Notes: create, edit, save and manage personal notes.
- Favourites: view all saved items in one place.
- Profile & settings: personal info, profile picture, password change, theme (light/dark) and language (Swahili/English).
- Premium content gating for subscribers (Shajara, full Tenzi, etc.).
- In-app sharing using native Android and iOS share options.
- Push notifications (Firebase Cloud Messaging or EAS).

### 4.2 Backend & Administration

- Django backend with a REST API serving all app features.
- User accounts, authentication and session/token management.
- Content management for devotions, prayers, hymns and the Bible.
- Subscription logic for monthly and annual plans.
- Secure data storage and API integration with the mobile app.

## 5. Deliverables

| # | Deliverable                | Description                                                 |
|---|----------------------------|-------------------------------------------------------------|
| 1 | Mobile app (Android & iOS) | Built with React Native and Expo, ready for the app stores. |
| 2 | Django backend & REST API  | Server application powering all app features.               |
| 3 | Admin/content management   | Ability to manage devotions, prayers, hymns and users.      |
| 4 | Deployment & hosting setup | Backend hosted and app builds prepared for publishing.      |
| 5 | Source code handover       | Full source code delivered to the client on final payment.  |
| 6 | Project documentation      | Requirements, design and deployment documents.              |

## 6. Technology Approach

| Layer              | Technology                          |
|--------------------|-------------------------------------|
| Mobile app         | React Native (Expo)                 |
| Backend            | Django (Python)                     |
| Database           | PostgreSQL                          |
| Push notifications | Firebase Cloud Messaging / EAS Push |
| Hosting            | Cloud hosting for the backend API   |

## 7. Development Phases

Development will progress through the following phases. The full delivery runs from commencement through to hosting and publishing.

| Phase                                 | Activities                                                     |
|---------------------------------------|----------------------------------------------------------------|
| <b>1. Setup &amp; design</b>          | Project setup, UI/UX design and technical preparation.         |
| <b>2. Core build</b>                  | Authentication, Bible, daily content, notes and navigation.    |
| <b>3. Premium &amp; subscriptions</b> | Subscription plans and premium content (Shajara, Tenzi, etc.). |
| <b>4. Notifications &amp; sharing</b> | Push notifications and native sharing on Android and iOS.      |
| <b>5. Testing &amp; hosting</b>       | Quality assurance, backend hosting and app-store preparation.  |

## 8. Budget & Payment Schedule

The total agreed cost for the development of the M-Kristo App is **3,500,000 TZS**. This amount is payable in two milestones, as agreed:

| Milestone              | When                                                                        | Amount        |
|------------------------|-----------------------------------------------------------------------------|---------------|
| <b>1. Commencement</b> | On acceptance of this proposal, to commence development through to hosting. | 2,500,000 TZS |
| <b>2. Completion</b>   | On completion of development and final handover.                            | 1,000,000 TZS |
| <b>Total</b>           |                                                                             | 3,500,000 TZS |

**Summary:** An initial payment of **2,500,000 TZS** is made to commence development (covering the work up to hosting), and the remaining **1,000,000 TZS** is paid on completion, bringing the total development cost to **3,500,000 TZS**.

**Note:** This price covers **software development only**. Recurring third-party costs are billed separately (see Section 9).

## 9. What the Price Includes & Excludes

### 9.1 Included

- Design and development of the mobile app and backend as scoped.
- Initial deployment of the backend and preparation of app builds.
- Source code and project documentation handover.

### 9.2 Not Included (billed separately or by the client)

- Recurring hosting, server and database subscription fees.
- Domain registration and annual renewal (e.g. m-kristo.com).
- Google Play and Apple Developer account fees.
- Third-party service fees (SMS/OTP gateway, payment gateway, Firebase paid tiers).
- New features or changes beyond the scope in Section 4.
- Ongoing maintenance and support after handover (available under a separate agreement).

## 10. Assumptions

- The client provides content (Bible text, prayers, hymns, devotions) or approves sources to be used.
- The client provides timely feedback and approvals at each phase.
- The client owns or provides the required accounts (app stores, domain, payment and SMS gateways) or authorises their setup.
- The scope in Section 4 is the agreed basis for this price; additional work will be quoted separately.

## 11. Terms & Conditions

- The total development fee is 3,500,000 TZS, payable per the schedule in Section 8.
- An initial payment of 2,500,000 TZS is required to commence work.
- The final payment of 1,000,000 TZS is due on completion, before final source-code handover.
- This price covers development only; recurring and third-party costs are excluded (Section 9).
- Any work outside the agreed scope will be quoted and agreed in writing before it begins.
- Ownership of the delivered source code transfers to the client upon full and final payment.
- This proposal is valid for 30 days from the date shown on the cover.

## 12. Acceptance & Signatures

By signing below, both parties agree to the scope, deliverables, budget and terms set out in this proposal for the development of the M-Kristo App.
