7. Assumptions, Constraints & Dependencies	
8. Acceptance Criteria	

1. Introduction

1.1 Purpose

This System Requirements Specification (SRS) defines the functional and non-functional requirements for the **M-Kristo App**, a mobile daily-devotions platform serving Swahili and English speaking believers in East Africa and worldwide. It is the reference document for design, development, testing and acceptance of the application.

1.2 Scope

M-Kristo is a cross-platform mobile application (Android and iOS) that delivers a free Bible, daily devotions and prayers, hymns and spiritual resources, with an optional paid subscription that unlocks advanced content. The product provides account creation with phone verification, multi-provider login, personal note taking, favourites, a bilingual interface (English and Swahili), configurable settings, push notifications and native app sharing.

1.3 Definitions, Acronyms and Abbreviations

Term	Meaning
Neno la Leo	Word of the Day - the daily scripture/devotion feed.
Tafakari	Reflection - the meditative reading tied to Neno la Leo.
Somo	Reading / lesson - the scripture reading of the day.
Sala	Prayer - prayer content and prayer reminders.
Novena	A structured nine-day sequence of prayers.
Shajara	Devotional diary / spiritual journal (premium content).
Tenzi	Hymns and worship songs (premium content).
Favorites	Items the user has saved for quick access.
OTP	One-Time Password sent by SMS for phone verification.
SRS	System Requirements Specification (this document).
SDD	System Design Document (companion document).

1.4 Intended Audience

- Product owner and stakeholders of M-Kristo.
- Development and QA engineers at BlueGrid Technologies.
- UI/UX designers producing the mobile interface.
- Project reviewers and future maintainers.

1.5 Technology Baseline

The client application is built with **React Native (Expo)** for Android and iOS. The backend is built with **Django**. Push notifications are delivered through **Firebase Cloud Messaging** or **Expo (EAS) Push**

Notifications - the specific mechanism is confirmed during the design phase.

2. Overall Description

2.1 Product Perspective

M-Kristo is a new, self-contained product. The mobile client communicates with the Django backend over secure HTTPS APIs. The backend integrates with an SMS gateway (phone verification), a payment provider (subscriptions) and a push-notification service.

2.2 Product Functions (Summary)

- Read the Bible in English and Swahili.
- Access daily content: Neno la Leo, Tafakari, Somo and Sala.
- Set and receive prayer (Sala) reminders.
- Read premium content: Shajara, Tenzi and Novena.
- Create, edit and manage personal notes.
- Save and browse favourites.
- Sign up, verify phone number by OTP, and log in (email/password and social providers such as Google and Apple).
- Manage profile: personal info, profile picture, password, theme and language.
- Subscribe monthly or annually to unlock advanced features.
- Share the app to others through native Android and iOS share sheets.
- Receive push notifications for daily content and reminders.

2.3 User Classes and Characteristics

User class	Description & access
Guest	Not signed in. May view onboarding/marketing only; must sign up to use the app.
Free user	Registered and verified. Access to Bible, daily content, Sala, notes and favourites.
Subscriber	Free features plus premium content (Shajara, Tenzi, Novena) via monthly/annual subscription.
Administrator	Back-office role that manages content, users and subscriptions (web/admin, out of app scope).

2.4 Operating Environment

- Android 8.0+ and iOS 14+ mobile devices.
- Intermittent connectivity typical of East African networks; core reading should tolerate offline/low-bandwidth conditions.
- Backend hosted on a Linux server environment running Django.

2.5 Localization

The application is bilingual. The default and primary language is **Swahili**, with full **English** support. The user may switch language at any time from settings; the selection persists across sessions and applies to navigation, content labels and notifications.

3. Functional Requirements

Each requirement has a unique identifier (FR-x) and a priority: **M** = Must have, **S** = Should have, **C** = Could have.

3.1 Authentication & Account

ID	Requirement	Pri.
FR-1	The system shall allow a first-time user to sign up with the required profile details.	M
FR-2	The system shall verify the user's phone number via an OTP code sent by SMS before the account is activated.	M
FR-3	The system shall allow the user to log in with email and password.	M
FR-4	The system shall support social login providers including Google and Apple (and others as configured).	S
FR-5	The system shall allow the user to reset a forgotten password.	M
FR-6	The system shall keep the user logged in across sessions using secure tokens until logout.	M

3.2 Bible & Reading

ID	Requirement	Pri.
FR-7	The system shall provide the full Bible for reading in both English and Swahili.	M
FR-8	The system shall let the user navigate by book, chapter and verse and search the text.	M
FR-9	The system shall allow the user to adjust reading font size and theme.	S
FR-10	The system shall allow core Bible reading to work offline once content is cached.	S

3.3 Daily Content (Neno la Leo, Tafakari, Somo, Sala)

ID	Requirement	Pri.
FR-11	The system shall present the daily Word (Neno la Leo) with its Reflection (Tafakari) and Reading (Somo).	M
FR-12	The system shall provide daily prayers (Sala).	M
FR-13	The system shall let the user set prayer/reminder times and receive reminders as notifications.	M

3.4 Premium Content (Shajara, Tenzi, Novena)

ID	Requirement	Pri.
FR-14	The system shall provide Shajara (devotional diary) to active subscribers only.	M
FR-15	The system shall provide Tenzi (hymns/songs) to active subscribers only.	M
FR-16	The system shall provide Novena prayer sequences.	M

ID	Requirement	Pri.
FR-17	The system shall clearly indicate locked premium content and prompt non-subscribers to subscribe.	M

3.5 Notes & Favourites

ID	Requirement	Pri.
FR-18	The system shall allow the user to create, edit and delete personal notes.	M
FR-19	The system shall allow the user to attach a note to a scripture or devotion.	S
FR-20	The system shall allow the user to save any item to Favourites.	M
FR-21	The system shall show all saved items on the Favourites screen and allow their removal.	M

3.6 Profile & Settings

ID	Requirement	Pri.
FR-22	The system shall display the user's profile information.	M
FR-23	The system shall allow the user to set/change a profile picture and personal info.	M
FR-24	The system shall allow the user to change the password.	M
FR-25	The system shall allow the user to switch theme (e.g. light/dark).	S
FR-26	The system shall allow the user to switch language between Swahili and English.	M

3.7 Navigation

ID	Requirement	Pri.
FR-27	The system shall provide a primary navigation menu with: Bible, Novena, Tenzi, Sala, Favourites and Profile.	M

3.8 Sharing & Notifications

ID	Requirement	Pri.
FR-28	The system shall allow the user to share the app using the native Android/iOS share method of their choice.	M
FR-29	The system shall deliver push notifications for daily content and reminders via Firebase or Expo (EAS).	M

4. External Interface Requirements

4.1 User Interfaces

- Modern, clean mobile layout, mobile-first and touch friendly.
- Bilingual labels (Swahili default, English available).
- Bottom navigation for Bible, Novena, Tenzi, Sala, Favourites, Profile.
- Accessible colour contrast and scalable text.

4.2 Software Interfaces

Interface	Purpose
Django REST API	All client-server communication over HTTPS.
SMS gateway	Sending OTP codes for phone verification.
Social identity (Google, Apple)	Federated sign-in.
Payment provider	Processing monthly/annual subscriptions.
Firebase / Expo EAS	Push notification delivery.

4.3 Communication Interfaces

- All network traffic over HTTPS/TLS.
- JSON as the API payload format.
- Token-based authentication for API requests.

5. Non-Functional Requirements

ID	Category	Requirement
NFR-1	Performance	Screens shall load within 3 seconds on a typical 3G/4G connection; cached content shall open instantly.
NFR-2	Availability	Backend services shall target 99.5% monthly uptime.
NFR-3	Security	Passwords shall be securely hashed; tokens stored in secure device storage; OTP codes expire quickly.
NFR-4	Privacy	Personal data handled per applicable data protection practices; users can update or delete their data.
NFR-5	Usability	First-time users shall complete signup and verification without external help.
NFR-6	Compatibility	Runs on Android 8+ and iOS 14+.
NFR-7	Localization	Full Swahili and English support across the UI and notifications.
NFR-8	Scalability	Backend shall scale to tens of thousands of concurrent users.
NFR-9	Maintainability	Modular codebase with documented APIs and automated builds via Expo EAS.
NFR-10	Offline	Core Bible reading and saved content available offline after first sync.

6. Subscription & Monetisation Requirements

M-Kristo is free to download and use for core features. Advanced features are unlocked through a paid subscription. Following the product decision, subscription is the monetisation model and a separate donation flow is **not** required for this release.

ID	Requirement
SR-1	The system shall offer a monthly subscription plan.
SR-2	The system shall offer an annual subscription plan.
SR-3	The system shall unlock premium content (Shajara, Tenzi and other advanced features) while a subscription is active.
SR-4	The system shall revoke premium access when a subscription expires or is cancelled.
SR-5	The system shall show current plan and renewal status in the profile.
SR-6	The system shall process payments through a secure third-party payment provider.

7. Assumptions, Constraints & Dependencies

7.1 Assumptions

- Users have a mobile phone capable of receiving SMS for verification.
- Bible and devotional content is licensed/available in both languages.
- A payment provider available in Tanzania is used for subscriptions.

7.2 Constraints

- Client implemented with React Native (Expo); backend with Django.
- App must be publishable to Google Play and the Apple App Store.
- Social login must comply with Google and Apple platform policies.

7.3 Dependencies

- SMS gateway availability for OTP delivery.
- Firebase or Expo EAS for push notifications.
- Third-party payment provider for subscription billing.

8. Acceptance Criteria

The release is accepted when the following are demonstrably true:

- A new user can sign up, receive an OTP, verify their phone and log in.
- Social login with Google and Apple works on both platforms.
- Bible, Neno la Leo, Tafakari, Somo and Sala are accessible in Swahili and English.
- Prayer reminders and daily notifications are delivered.
- Notes and favourites can be created, viewed and removed.
- Premium content is locked for free users and unlocked for active subscribers.
- Monthly and annual subscriptions can be purchased and correctly gate access.
- The app can be shared using native Android and iOS share sheets.
- Profile info, picture, password, theme and language can be updated.
